Big Data Fundamentals: Concepts, Drives, and Techniques Reviews

Information systems are central to the operations of modern society. With the growth of the Internet and the development of powerful computing environments, data management is now an integral part of many enterprises, and the field of data management is central to many important business decisions. This textbook covers a broad range of topics, from the fundamentals of data management to the latest developments in the field. It is designed for both undergraduate and graduate students, as well as professionals in the field. The textbook is organized into three parts: fundamentals, advanced topics, and applications. The fundamentals part covers the basic concepts and terminology of data management, including the basic operations of data management, the management of data in databases, and the management of data in data warehouses. The advanced topics part covers more advanced concepts, such as data mining, data integration, and data management in distributed systems. The applications part covers the use of data management in various industries, such as finance, healthcare, and telecommunications. The textbook is written in clear and concise language, and includes numerous examples and exercises to help students understand the concepts. It is an excellent resource for students and professionals in the field of data management.

He holds MCAD & MCTS (Microsoft), SOA Architect, Big Data Scientist, Big Data Engineer and Big Data Consultant (Arcitura) certifications. Dr. Paul Buhler is a seasoned professional who has worked in commercial, government and academic environments. He is a respected researcher, practitioner and educator of service-oriented computing concepts, technologies and implementation methodologies. This book is divided into two parts with the first part introducing concepts about Big Data, and the second part discussing implementations of Big Data. I found the first part to use confusing wording, while the second part was written much better. I would give the first part 3-stars and the second part 5-stars if I was rating them individually.
